

Blackberry

An identification tool to introduced and native *Rubus* in Australia

is an interactive CD ROM enabling the identification of all species of *Rubus* presently known to occur in Australia. From this first step of identification will follow the next stage of documenting the most effective means of control of each of the species of the *Rubus fruticosus* aggregate. Once these means have been established this information can be added to future versions of the tool.

For Windows 95 or higher

The recommended retail price is AU\$60. Prices are exclusive of GST. If within Australia please add 10% GST and A\$9 postage and handling. For all other destinations please add AU\$15 postage and handling. Prices are subject to change without notice.
